PROFESSIONAL SUMMARY

Associate Technical Consultant and Program Management professional with experience in stakeholder coordination, workflow management, business process analysis, and enterprise operations. Skilled in client communication, documentation, requirement gathering, Excel-based reporting, Agile collaboration, and cross-functional coordination. Proven ability to manage multiple tasks, maintain operational records, and support successful program delivery in fast-paced environments.

WORK EXPERIENCE

WNS Global Services | Jun 2025 - Present

Associate Technical Consultant

- **Application Development:** Developed and enhanced low-code enterprise applications using the Appian platform, building workflows, process models, and business rules to automate end-to-end processes.
- **UI/UX Design:** Designed and configured responsive, user-friendly interfaces, reports, and dashboards using Appian SAIL components, ensuring a seamless user experience across devices.
- **Data Management:** Configured and managed application data models, including the creation of Custom Data Types (CDTs), data store mappings, and entity-backed Record Types for efficient data retrieval.
- **Performance & Optimization:** Participated in application testing, troubleshooting, debugging, and workflow optimization activities to improve application performance, stability, and process execution efficiency.
- **Agile Collaboration:** Collaborated closely with Business Analysts and cross-functional teams to understand functional requirements, resolve issues, and support Agile sprint delivery in enterprise environments.
- **Defect Resolution:** Actively resolved JIRA-tracked bugs and supported unit testing, ensuring high-quality deliverables and smooth deployment across environments.
- **Application Support:** Provided enterprise application support, issue analysis, and troubleshooting for workflow-based business applications.

Iamneo | Jan, 2025 - May, 2025

Program Management Specialist Trainee

- Coordinated with internal teams and stakeholders to support assessment delivery across multiple universities.
- Managed content validation, quality checks, and packaging activities while ensuring timely completion of project milestones.
- Maintained operational trackers, documentation, and status updates for ongoing programs.
- Assisted in stakeholder communication and follow-ups to ensure smooth execution of assessment activities.
- Participated in issue tracking, resolution coordination, and process improvement initiatives.
- Worked with cross-functional teams to ensure adherence to timelines and quality standards.
- Prepared reports and maintained records to support program monitoring and execution.

CERTIFICATIONS

Appian Certified Associate Developer L1

PROJECTS

Internal Application Development

Project Quality Governance Application

- Built an internal auditing tool for Delivery Managers to evaluate live projects against predefined criteria and generate performance scores.
- Designed multi-step SAIL interfaces and portals for score input and review; implemented CDTs and process models to manage audit workflows end-to-end.
- Used SQL-backed records for data persistence and reporting; leveraged AI-assisted development to accelerate interface design.

POC Projects

Legal Entity Onboarding

- Developed a POC application to streamline onboarding of new legal entities (corporations, partnerships) by Investment Operations and Client Implementation teams.
- Designed workflow forms and process flows covering entity registration, account setup, share issuance, and multi-stage review approvals across teams.

Delivery Management

- Built a POC workflow application to manage show promo requests across Production, Creative, and Media teams.
- Automated a sequential approval chain Production submits request → Creative team approves → Media team validates the final deliverable reducing manual follow-ups.

Turf Booking Application

- Independently developed a slot-based turf booking app using AI-assisted development zero manual coding involved.
- Explored end-to-end app building using AI tools, reinforcing skills in requirement framing, prompt engineering, and iterative development.

EDUCATION

- **B.E - CSE** | Bannari Amman Institute Of Technology, Sathyamangalam

CGPA: **7.55**

TECHNICAL SKILLS

- Appian
- Database: SQL (queries, data analysis, record-backed views, basic troubleshooting)
- Programming/Tools: Python, HTML, MS Excel, JIRA, Power BI
- Concepts: Business Process Analysis, Requirement Gathering, Agile / Scrum, Workflow Automation, SQL Data Analysis, Process Documentation, Deployment Support
- AI-Assisted Development
- Data Validation
- Flow Diagram Creation
- Workflow Documentation
